

# PAVEL KULIASOV

Full Stack Developer

## Summary

---

**Full-Stack Developer** with a strong background in frontend and backend development, specializing in TypeScript/JavaScript and React. Committed to delivering high-quality code and exceptional user experiences, I am passionate about creating efficient and user-friendly applications.

## Professional Experience

---

**SueApp Ltd. | Tel-Aviv, Israel**

October 2022 – Present

Full Stack Developer

- As a developer, I was responsible for creating a new version of the website using React, Redux, Chakra, and TypeScript. In addition, I re-wrote the backend API from JavaScript to TypeScript to improve code maintainability and scalability.
- Implemented CI/CD pipeline using GitHub Actions and AWS, which involved automated testing, build, and deployment processes. This pipeline significantly reduced the amount of time to deploy new features and updates.
- I collaborated with and coordinated the work of interns to ensure that they were effectively contributing to the project. I provided mentorship and guidance to the interns, helping them develop their technical skills and knowledge.

**Self-employed | Saint-Petersburg, Russia**

2021 – Present

Freelance Frontend Developer

- Proficient in creating responsive web pages using HTML5, CSS3, and JavaScript ES6+
- Experienced in building dynamic user interfaces and managing application state using React, Redux, and RESTful APIs.
