MY PROJECTS

- **Feb 2023 - present / Family budget**

Description: This application will help to avoid cost overruns. The application is convenient to use to track cash flow, financial habits and set new financial goals.

Responsibilities: A convenient and intuitive interface for tracking cash flows has been thought out and created.

- **Feb 2023 - present / Translogistic**

Description: It's startup whose goal is to digitalize and automate transport logistics for industrial and transport companies. The platform combines tools that make the freight forwarder or transport manager and manufacturing companies more efficient and increases the level of the transport company.

Responsibilities: UX and UI development of a web application for automation of transport logistics: design of various sections of the web application, filters, segments, etc.

- **Feb 2023 - Mar 2023 / Mobile App Optimization**

Description: A universal mobile application for optimizing security and performance for iOS devices.

Responsibilities: UI and UX design of the application with tools that will help you use your mobile device as efficiently as possible: memory cleaner, VPN, blocking ads and trackers, checking Internet connection speed, the ability to add a tab for private storage of media files from the gallery and contacts.

- **Jan 2023 - Feb 2023 / State website**

Description: Website for the government Belarus booking of free retail spaces in shopping malls and parking spaces for seasonal trade of domestic fruit and vegetable products in the markets of Minsk

Responsibilities: Redesigned the website.

- **Jun 2022 - Feb 2023 / Team**

Description: It is a web application that is used to create a CV and store information about employees, up-to-date information about the company and projects.

Responsibilities: UX and UI design development of a web application for business and HR management: design of different sections of the web app, filters, segments, etc. Collaboration with a BA and developers to make the product more user-friendly.

- **Dec 2022 - Feb 2023 / Bloomer Health**

Description: Bloomer Health is a web-based application. Consists of 2 parts: therapist's dashboard and admin panel. It is approved to provide Early Intervention services in NYC. Early Intervention Program is intended for children from birth to 3 years with developmental delays or disabilities and their families

Responsibilities: Redesign of the organization's website for early intervention and design development for new pages.

MY PROJECTS

- **Mar 2022 - Apr 2022 / TraWell**

Description: TraWell is a mobile application for travelers.

Responsibilities: At the final stage of my training, I developed the design of the Travel application, which helps travelers create, edit their own and ready-made routes, keep a personal diary or travel blog. In the process of working on the project, I used gamification elements.

- **Mar 2022 - Apr 2022 / NFT online store**

Description: The project's goal is to create a platform for buying and selling NFT products.

Responsibilities: Developed the design of the NFT online store and the adaptation of the site for the mobile version

- **Feb 2022 - Mar 2022 / Habitika**

Description: A website for the computer game Habitika, which helps to improve your habits in real life.

Responsibilities: Redesigned the website for the computer game Habitika.

- **Feb 2022 - Mar 2022 / Harry Potter**

Description: A website about Harry Potter. This site brings together everything that fans of this character would like to find on the Internet: movies, books, games and much more.

Responsibilities: Developed a website design that adheres to the atmosphere with user-friendly interface.

- **Jan 2022 - Feb 2022 / Portfolio**

Description: Website for displaying the photographer's portfolio. Task: to focus on strengths, to help attract clients by demonstrating skills and to help potential employers and clients evaluate the professional growth of the photographer.

Responsibilities: Development of a website design for displaying a portfolio.

- **Jan 2022 - Feb 2022 / Dashboard**

Description: Dashboard is the transformation of information by analyzing it into a structured format. To present this clearly, evaluate important indicators, as a result of which make better decisions.

Responsibilities: Collecting information and working out design for Dashboard
