

# ZELINSKIY    MAKSIM

## PYTHON DEVELOPER

---

### PROFILE SUMMARY

Regarding my professional activity, I'm working on two big projects, taking up the key positions as a developer. One of these projects was presented in November 2022 at WebSummit, this project is directly related to Artificial Intelligence, which we use through OpenAI API, we make interesting and engaging automated articles from the available data.

Regarding the second project with another team, we are creating various Telegram bots with 50+ thousands of the audience. At the moment, I'm looking for the opportunities to move to a new level.

Also, recently I got an interesting experience of working as TeamLead, managed programming team, set up the development methodology using SCRUM, managed the entire team, distributed and delegated tasks.

In my free time, I'm interested in new trends in the IT world.

---

### SOFT SKILLS

Goal-oriented	Teamwork
Empathy	Problem-solving
Delegation	Leadership
Flexibility	Adaptive

### HARD SKILLS

Python, JavaScript, Django/DRF/Flask, Linux, AI, OpenAI, AI, Git, PSQL, Docker, English B1

---

### WORK EXPERIENCE

#### Python Developer (Chief Technology Officer)

06, 2022 – now

##### BotsEver

###### STACK:

Python, Django, AI, OpenAI, AWS amazon (S3, boto3), PostgreSQL/MongoDB, OOP, Docker, LINUX, REST API, JSON, Git, WordPress, HTML, CSS, JS, pillow, asyncio.

- Development of bots
- Product creation
- Work with automationIntegration with various APIs (more than 10)

#### Python Developer

01, 2023 – now

##### Upgrade

###### STACK:

Python, aiogram, telegramAPI, 1C, PSQL/MongoDB, OOP, LINUX, REST API, JSON, Git, Docker, HTML/CSS, asyncio.

- Great project 50+ thousand audience
- Personal development of Telegram bots (15+ orders)

#### TeamLead

04, 2023 – 06.2023

##### RonisTechno

- Management of programming team;
- Investigate architectural solutions;
- Code review;
- Integrate new functionality and third-party services.
