given a script that had to be followed.	Materials in the size of 200 video files were provided.	given a script that had to be followed.
1. Detailed study of the scenario	4. generating the first frames. Thinking about how best to implement the script idea.	7. We review it again, check whether everything corresponds to the script. we add, delete, change passages to others to achieve maximum harmony
2. Sorting of material to facilitate further processing	5. We continue our work taking into account the principles of installation. We take into account the rhythm and tempo of the video.	8.we add visual video, audio effects to achieve greater realism
3. Selection of the best personnel.	6. We are finalizing the first version of the complete look of the clip.	9.We animate the camera in frames where it is necessary.
10.We carry out primary and secondary color correction, reduce colors to one harmony. We create a mood.	11.We review once again, clarify whether everything matches the script. need to make sure that you want to watch the video to the end	**finish**

On the next page you can view the script
