

AURORA BOREALIS

EMBARK ON THIS
ENCHANTING JOURNEY!

ALL YOU'D WANT TO KNOW

What are they?

Northern Lights

A mesmerizing natural phenomenon that illuminates the night skies with vibrant colors and ethereal beauty

Just imagine:

A celestial dance of shimmering green, blue, purple and red hues splashed across the heavens!

Aurora

The Roman Goddess of the Dawn

Boreas

The Greek god of the North Wind

Literally: Dawn Wind

The phenomenon of Northern Lights, was studied together by ancient Roman and Greek astronomers.

WHY AURORA BOREALIS?

WHEN IS THE BEST TIME TO SEE IT?

Late Autumn and Winter are perfect to catch a glimpse of the phenomenon.

One of the reasons why autumn and winter are ideal for observing the Northern Lights is the longer and **darker nights**. The extended darkness allows for a better opportunity to witness this natural light show

BUT: keep in mind that the Northern Lights are a marvel of nature and can be unpredictable, so patience and luck are also essential factors when trying to catch this magical spectacle
