

Water Pollution

Heartbreaking reality

Introduction Words

The

Contamination

of water sources by Human Activities

not only suffocates aquatic life but also

poses a grave Danger to the overall

well-being of our fragile ecosystem.

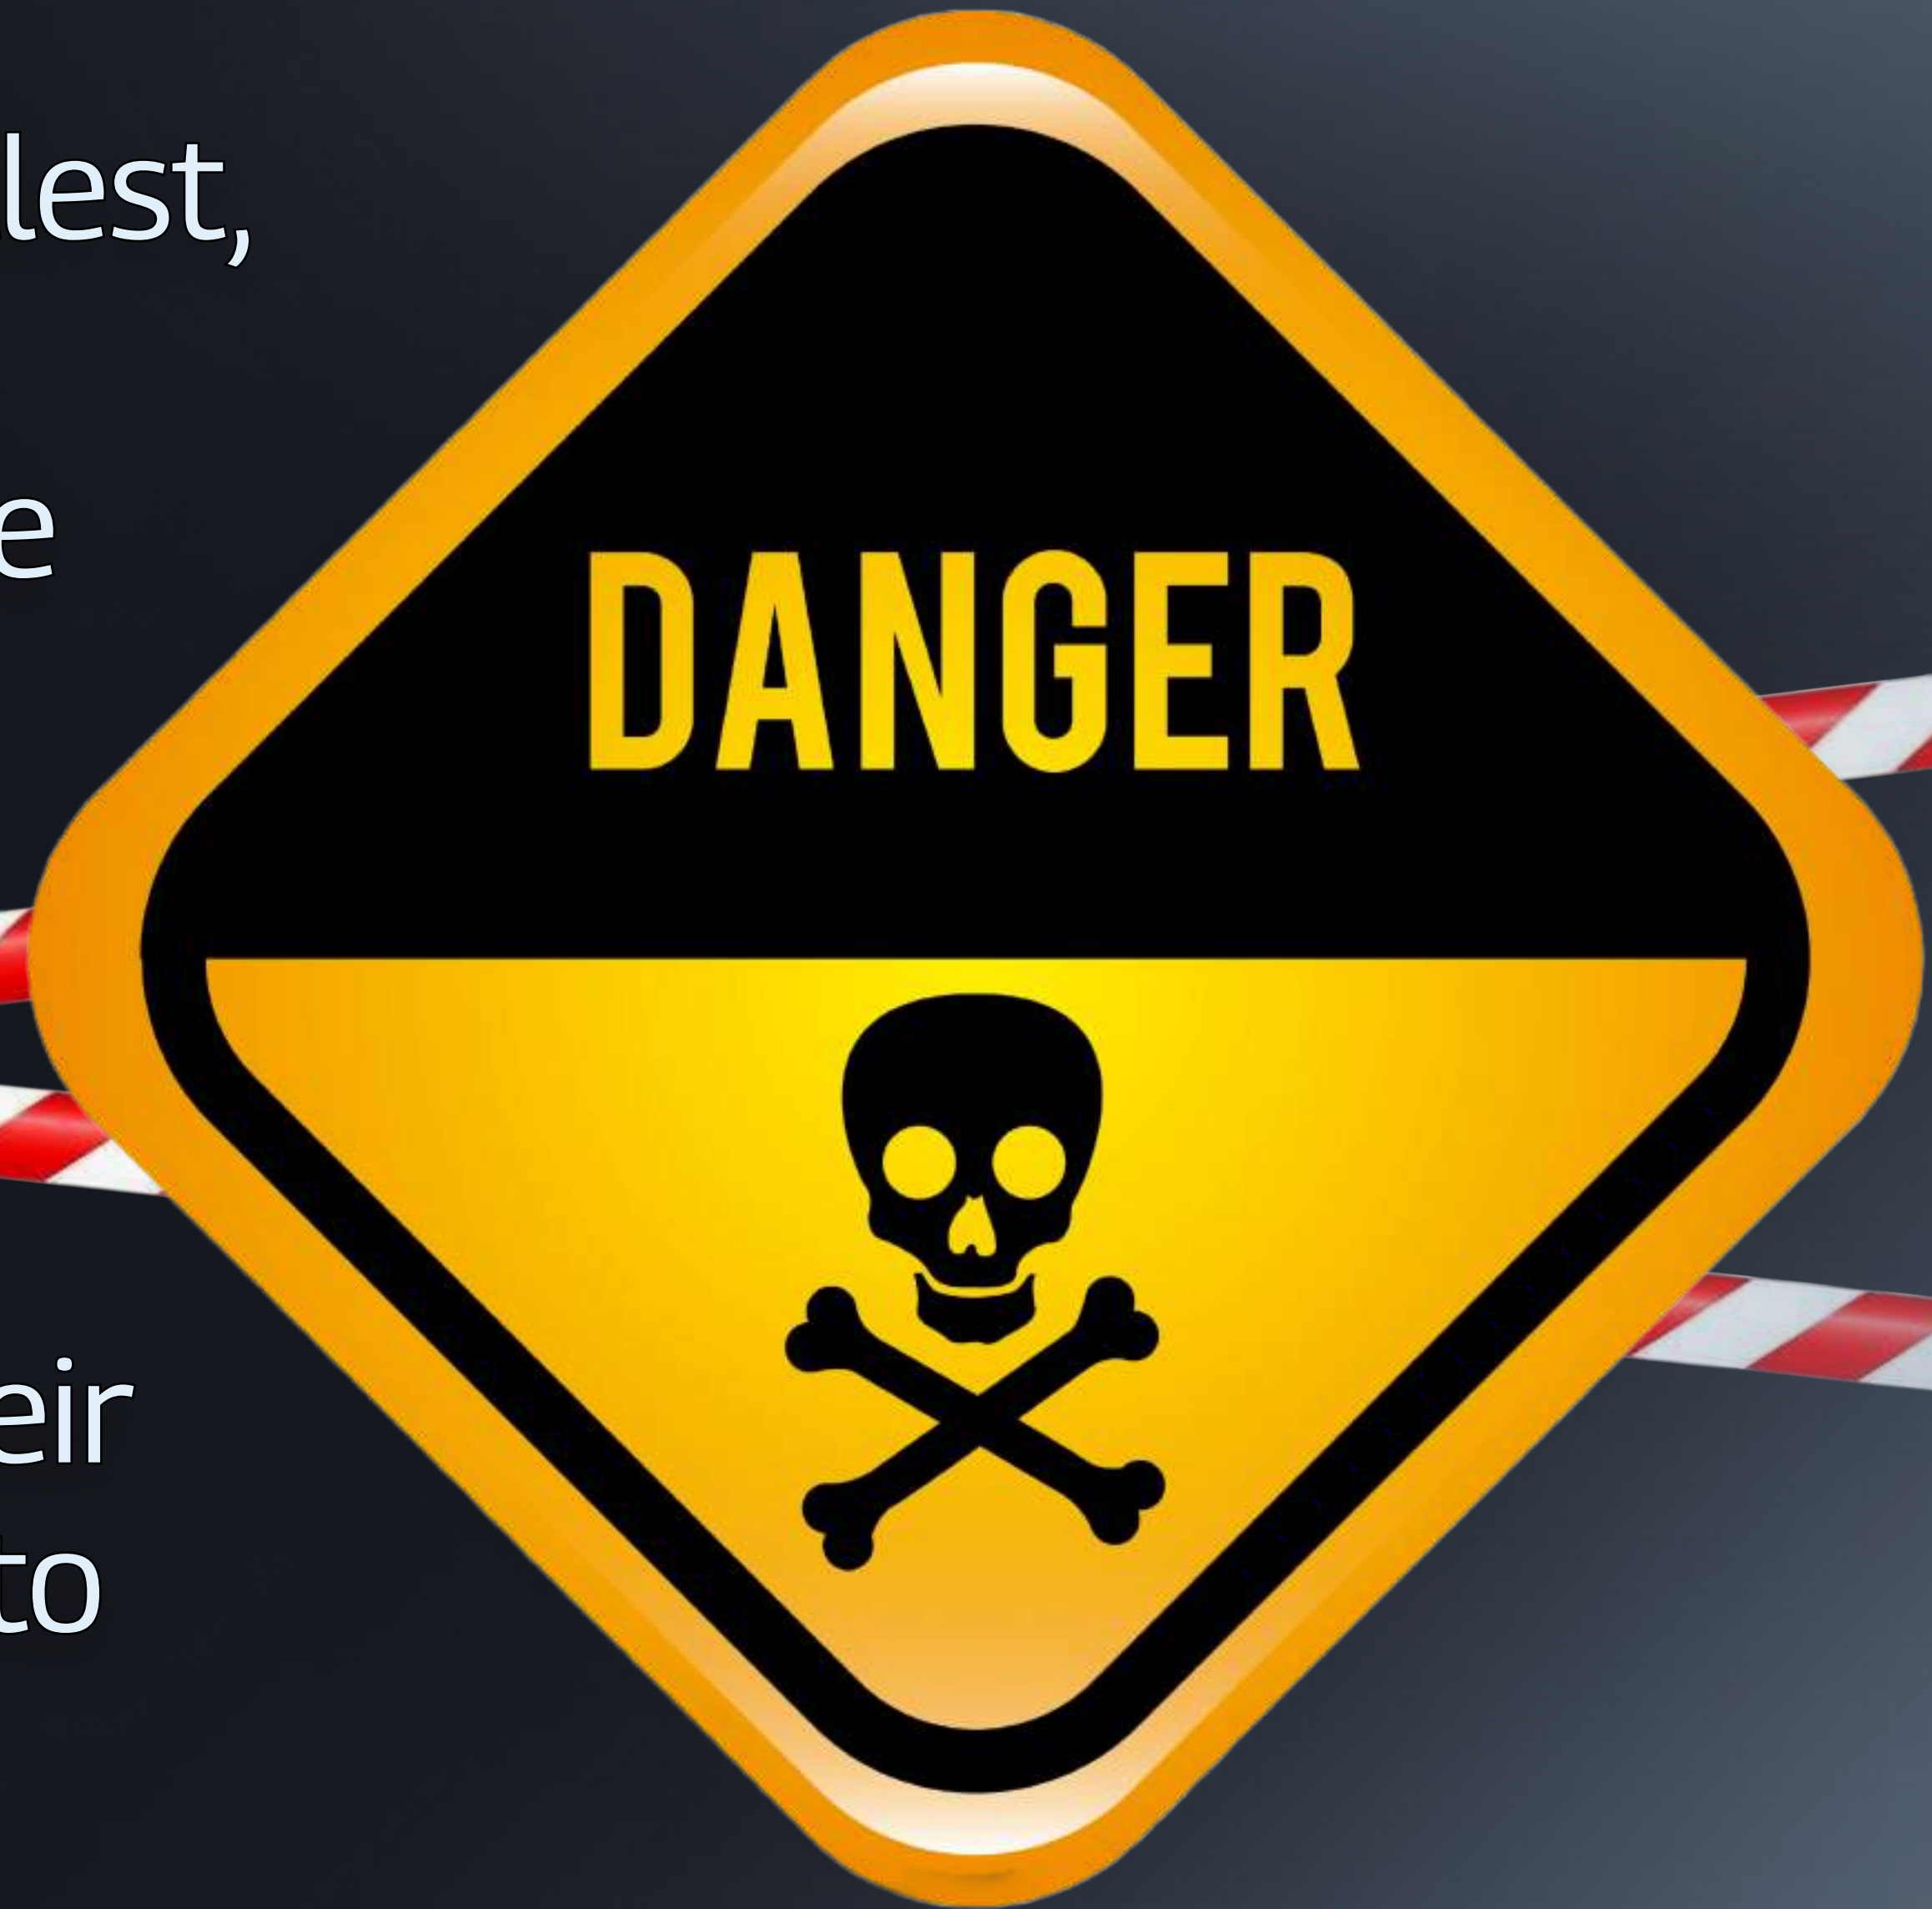

A close-up photograph of water being poured from a white faucet into a clear glass. The water is captured in mid-pour, creating a dynamic, flowing shape. The background is a solid, dark blue-grey color.

EVERY drop of water

We carelessly **Pollute**
carries WITH it a story of despair and longing.

It encapsulates the struggle of countless species, from the smallest, most delicate organisms to the grandest creatures that roam the depths.

These innocent beings witness their once pristine homes transform into toxic wastelands, choked with garbage, oil spills, and chemicals.

Our mother Earth is
71% water

What it includes?

Lakes

Rivers

Streams

Water underground

An underwater scene showing significant ocean pollution. In the foreground, there is a large, tangled mass of white plastic debris, including what appears to be a piece of a boat's hull or a large bag, with some seaweed and driftwood attached. To the right, several white plastic cups are floating. The water is a deep blue-green, and numerous small, dark fish are visible swimming around the debris. The text "Don't YOU feel sad?" is overlaid in a large, white, sans-serif font. A pink arrow points from the word "YOU" towards the plastic debris on the left. A blue curved line is visible in the upper left corner, and several small blue bubbles are scattered throughout the scene.

Don't
YOU
feel sad?

Our Oceans,
Seas,
Rivers and Lakes
are in huge
Danger

There is **NO**
ocean or sea
which is
not
used as a
dump

The Fault is Ours

Factories produce a lot of waste
and pour it into the water
poisoning it

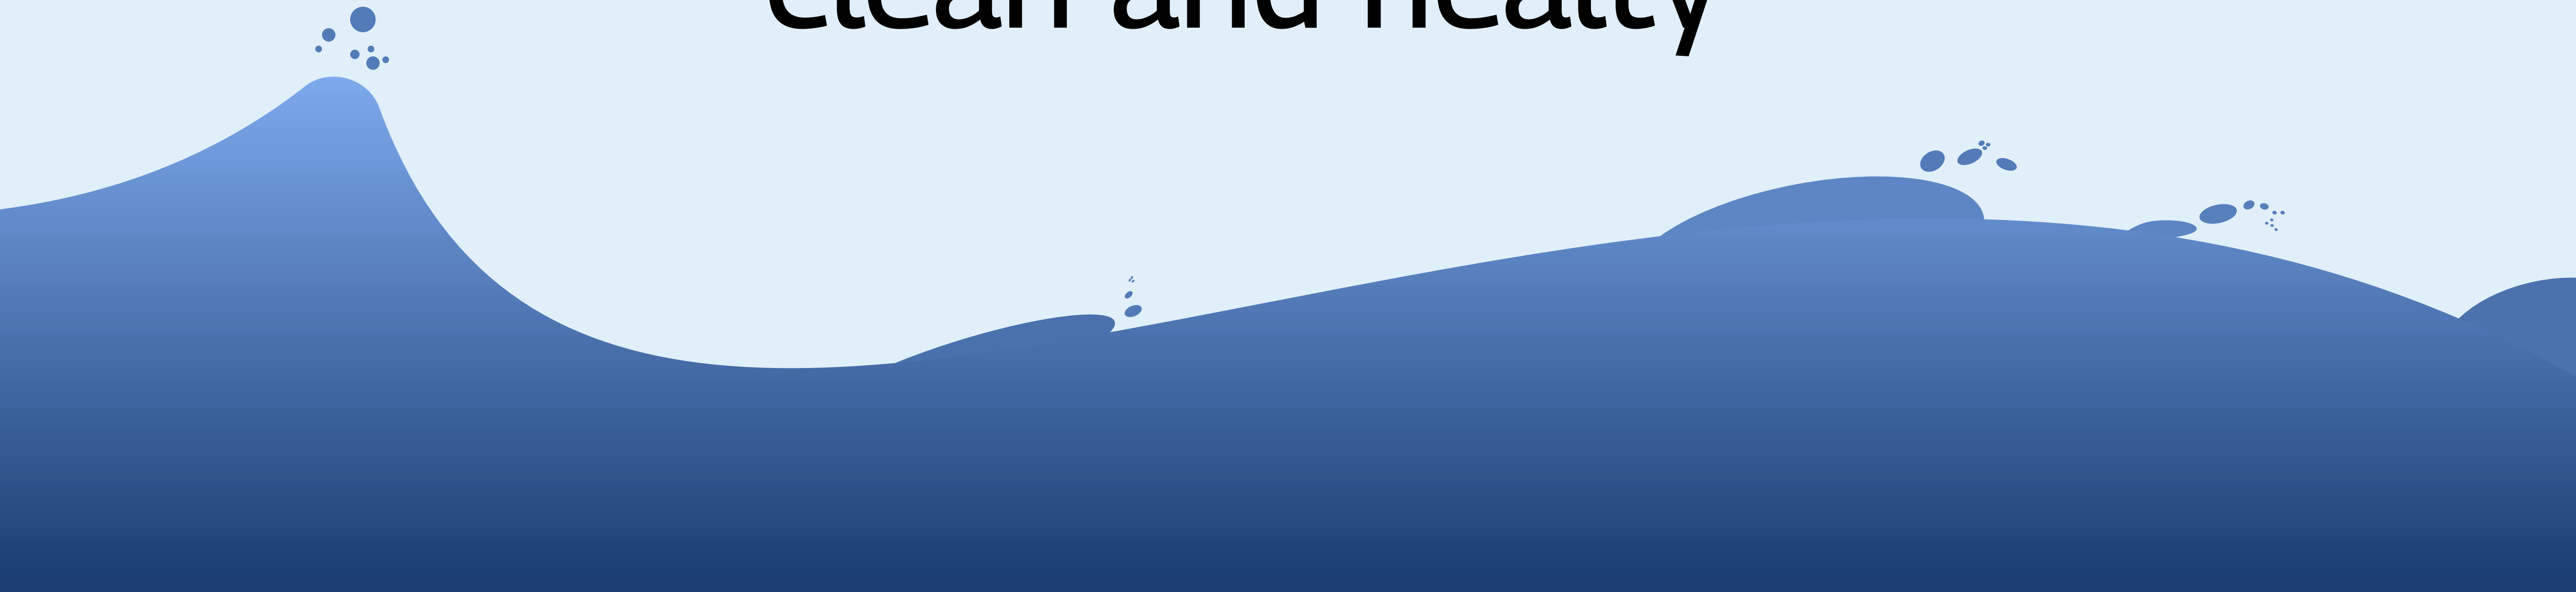

If People drink
this dirty Water
They can Die

Our mission

①

Keep our water
clean and healthy

Our mission

②

Take care of our
Mother Earth

Remember!

Be Careful with Nature

We are all in the same boat
