A second position on our list does not fall far away in terms of offered perks and game variety. We list SuperBoss here not only due to a massive selection of over 4000 Bitcoin games, but also due to factors like the availability of bonuses for four out of five first deposits of a player. The wagering requirement is pretty average, and you may encounter a number of x40 across many casinos worldwide.

With a Live Chat available 24/7, we found no issues while the help was required while writing this review. The Support Staff gladly answered our questions, and we did not have to wait for long. Overall, the casino has a decent safety rating, thanks to the Curaçao regulation and the integration of the Provably Fair protocol.

What stands out about SuperBoss Casino is the available provider variety. Here, you may encounter not only the ones that are regular, but still high quality, like Netent, Play'n GO, BGaming, but also the ones like Enjoy Gaming, 3 OAKS, Amusnet.

For those that enjoy simplicity as we do, Vavada Casino is a place to go. The platform does not offer any bonuses, but over 5000 mobile-compatible games are available here for Bitcoin players that also love to get a chance to win massive Jackpots during their gameplay.

Since its establishment in 2017, Vavada Casino has managed to create an anonymous platform for players that enjoy the swiftness of Bitcoin transactions. We have found that the Live Chat is also available here 24/7 for everyone, regardless of the VIP ranking. The casino's safety is backed up not only by the regulation of the Curaçao Government, but also by many players online that leave greatly positive feedback to the platform.

BC.Game - Enormous Deposit Multipliers 8.9/10

BC.Game, a well-known Bitcoin casino, focuses exclusively on BTC depositors and provides an NFT integration, appealing deposit bonus multipliers, innovative casino games, a user-friendly sportsbook, and a rewarding VIP Program. We personally enjoyed the diversity of offered games that was accompanied by the massive 180% first deposit bonus. We consider the wagering requirement to be on the lower side as well.

With its Curaçao license and adherence to the Provably Fair protocol, BC.Game ensures a secure and dependable gambling environment, instilling trust and assurance in players. BC Originals is a provider developed exclusively by the platform. Considering these attributes, BC.Game confidently secures the well-deserved fifth position on our list.

At Winz.io, you can explore a wide array of Bitcoin games from well-known providers such as Evolution, Pragmatic Play, Lucky Streak, and Ezugi. Moreover, they also offer titles from lesser-known providers like Winfinity, Playtech, and Vivo Gaming. The Promotions section is particularly attractive, featuring wager-free offerings, a daily cashback deal, and appealing level-up bonuses. With support for various crypto coins, players have numerous options to choose from at Winz.io. Sol Casino - Get Bonuses for First 5 Deposits

8.4/10

[VIDEO](#)

Promotion variety is really a strong part of the Sol Casino. Not only do they offer massive deposit bonuses for the first 5 deposits made by a player, but various cashback, tournaments, and prizes are also playing a big role in Sol Casino's reward structure. The ability to earn SolCoins that determine your rank, has further enhanced our decision to list this platform here.

Considering that this is a relatively new website, they have already done a massive job to attract numerous Bitcoin depositors. After its establishment in 2019, Sol Casino has made its way to offering over 4000 Bitcoin games to players worldwide. The Security measures are also playing a big role here, as the casino is regulated by the Curaçao Government.

At Games.Bitcoin.com, players can enjoy an exclusive BTC and BTC Cash platform that guarantees anonymous gameplay, ensuring no collection of personal data by the casino. Despite lacking a valid gaming license and being operated by the government of Costa Rica,

our experience at Bitcoin.com Games was still enjoyable, partly due to the inclusion of the Provably Fair gaming protocol, which compensates for the absence of a license.

Although initially disappointed by the 10% cashback on the first deposit, the website makes up for it with a variety of other promotions. Customer support is available 24/7 via chat and email, ensuring prompt assistance for any issues or inquiries. Consequently, when the bonus was not automatically issued, the staff provided immediate help to resolve the matter. Considering all these aspects, Bitcoin.com Games earns a solid third position on our list.

Empire.io - 20% Cashback and a VIP Program

8.3/10

VIDEO

Empire.io will especially appeal to the Bitcoin gamblers not only due to the generous welcome offer of 100%, they also offer a great 20% cashback on weekly losses and the 20 free spins that await players after completing the KYC process. The selection of Bitcoin-supported games spans as far as 3000 titles, which are all mobile and tablet compatible.

We consider the website to look better than the average casino website - the menus are placed well, and the folding function is included to avoid an overload of information while playing the games. With this in mind, the casino lacks a lower wager requirement in order to be higher on the list, in our opinion.

Casinoin - 100% Bonus + 20% Cashback 8.0/10

Casinoin is a decent choice for the Bitcoin gamblers, offering not only deposit bonus + cashback combination, but also a great user experience, that is produced by the simplicity of

the user interface, which is convenient on both desktop and mobile. The casino lacks support for more crypto coins in order to be higher, but this is still a great choice, especially considering that the platform offers SportsBook and Bingo alongside the classic Casino.

Unfortunately, Casinoin does not provide a mobile app for the users, but we have found that all the Bitcoin-compatible titles are totally accessible from mobile browsers. The casino has its safety measures in place, as per Curaçao regulation.
