AirPods MAX

Hey there! Today, I'm gonna show you two cool websites I've put together. These bad boys were crafted straight out of Figma mockups and some other cool tools. You'll get to see how I turned my ideas into reality and get the lowdown on the whole development process. So, let's dive in and explore the world of my projects!

PROJECT 1 - [AIRPODS MAX]

- I whipped up this site for myself, you know, just to flex my knowledge muscles. It's all about testing my skills and its powered by some cool JavaScript magic.

```
const chooseColor = document.querySelectorAll('.choose_color-btn');
const contentItem = document.querySelectorAll('.content-item');

chooseColor.forEach(function (element){
  element.addEventListener('click', open)
})

function open(evt){
  const target = evt.currentTarget;
  const button = target.dataset.button;
  const contentActive = document.querySelectorAll(`.${button}`);

  chooseColor.forEach(function(item) {
    item.classList.remove('choose_color_btn--active')
  })

  target.classList.add('choose_color_btn--active')

  contentItem.forEach(function(item){
    item.classList.remove('content-item_active')
  });

  contentActive.forEach(function(item) {
    item.classList.add('content-item_active')
  })
}

var logo = document.getElementById("logo");
logo.addEventListener("click", function(event) {
  event.preventDefault();

  window.scrollTo({
    top: 0,
    behavior: "smooth"
  });
});
```

COOL FEATURES:

- So, here's the fun part – this site is all about clicking images. Let's say the main interface is in blue, but if you click on those green headphones, it's all about green headphones, and the whole interface gets a makeover. It's like a chameleon, thanks to some JavaScript wizardry. With this project, I learned the ropes of JavaScript like a boss. This website is basically a slick landing page.

DEMO:

- Now, let's cut to the chase and see it in action. [Покажите несколько скриншотов или демо-версию сайта].

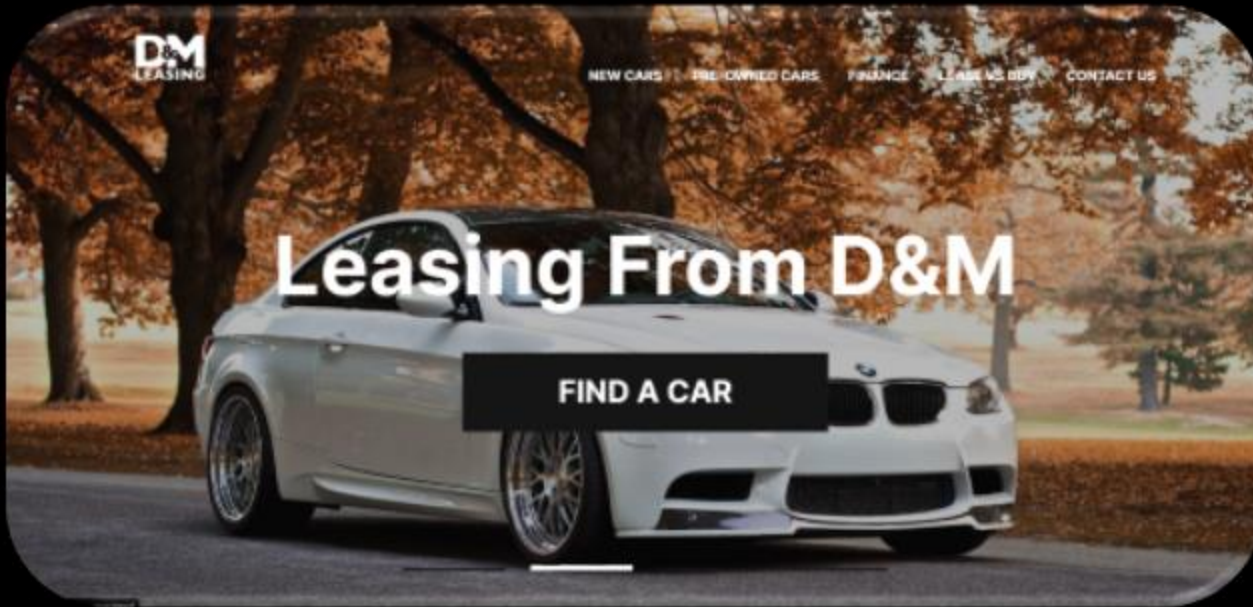

ACHIEVEMENTS:

- And as a bonus, it boosted my skills and confidence levels. I leveled up my JavaScript game and created a site that I'm totally proud of.

PROJECT 2 - [PURCHASING A VEHICLE]

- Project Description: This project is a multi-page website, and it's all about cars, specifically buying them. It's not just a simple landing page; it's a full-blown site.

The "Contact Us" form is located on a white background. At the top, it has the heading "Contact Us" and a subtext "Feel free to contact us with questions, potential partnerships or media inquiries". Below this, there are three input fields: "Name", "E-mail", and a larger "Your text" area. A black "SUBMIT" button is at the bottom right of the form.This section is titled "Choose your car" and features four car models displayed in a grid. Each car has a small image, its name, and leasing details. The categories "Car and Minivan", "Trucks", "Crossovers & SUVs", and "Electrified" are listed at the top of the grid.

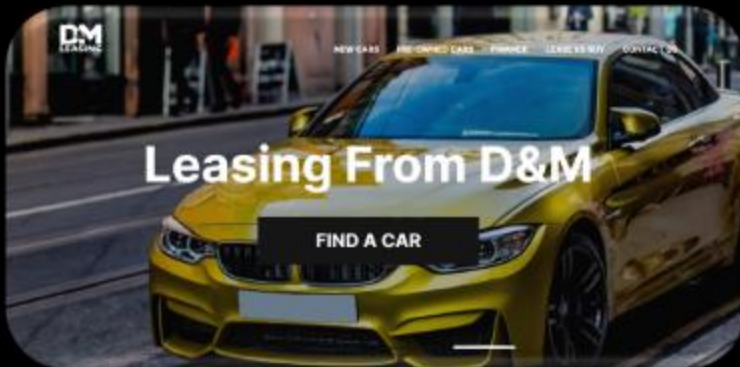

Car and Minivan	Trucks	Crossovers & SUVs	Electrified
 Toyota Crown 2023 starting from \$ 39900 \$ 650/mo see details	 Prius Prime 2023 starting from \$ 39900 \$ 450/mo see details	 Toyota Prius 2023 starting from \$ 39900 \$ 400/mo see details	 Hyundai Kona 2023 starting from \$ 39900 \$ 510/mo see details

GOALS AND OBJECTIVES:

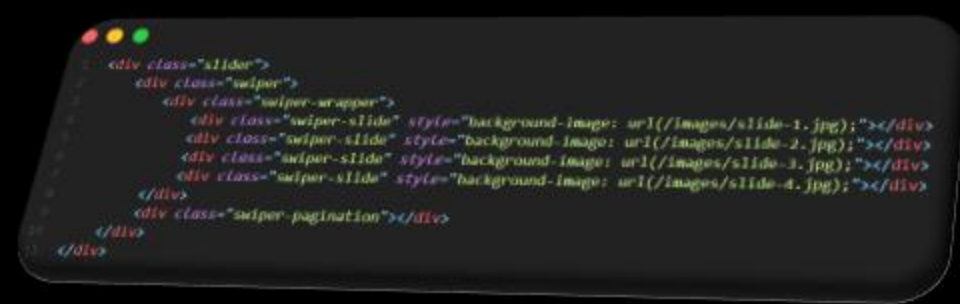

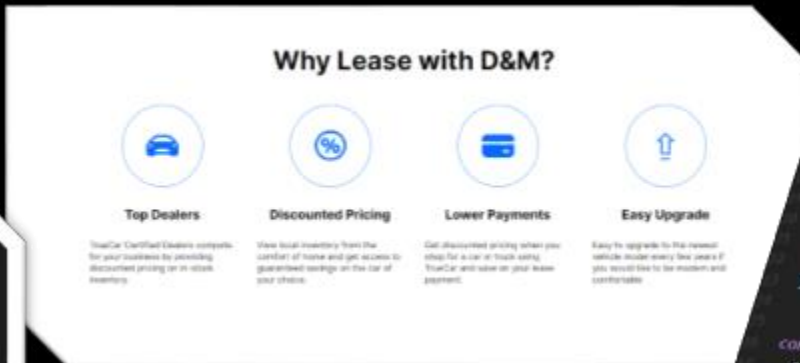

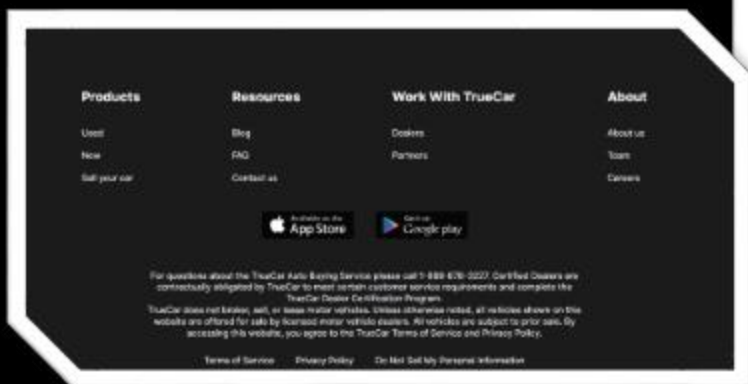

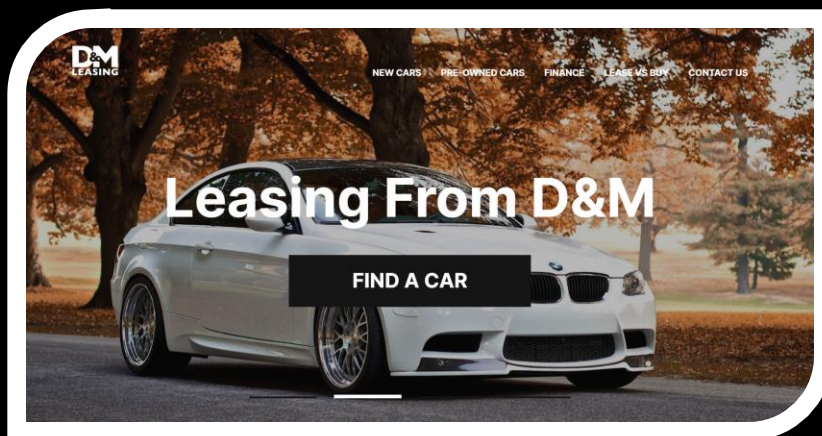

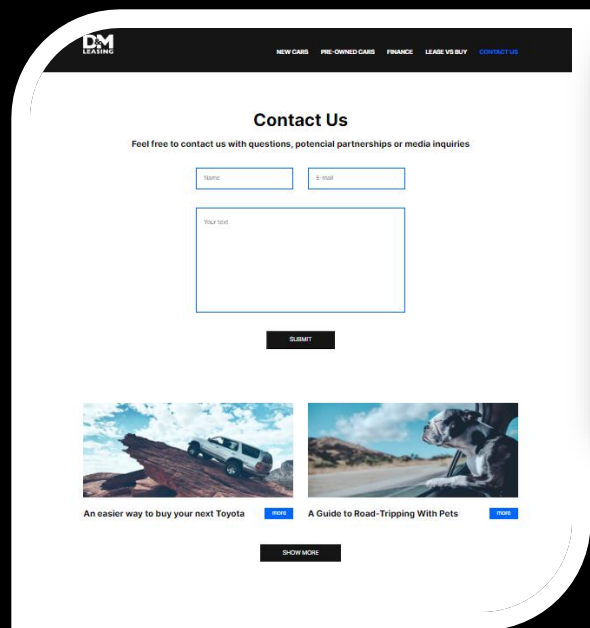

- When I started working on this project, my main goal was to create a user-friendly platform for car enthusiasts looking to purchase their dream vehicles. This project is a labor of love, built for myself to hone my skills and create something awesome.

COOL FEATURES:

What makes this site stand out are the cool features. I used JavaScript, particularly a swapper function, to make the images change on the main page, making it look sleek and dynamic. The main page is a real eye-catcher with its beautiful image transitions.

DEMO: NOW, LET'S DIVE INTO IT AND SEE HOW IT ROLLS.

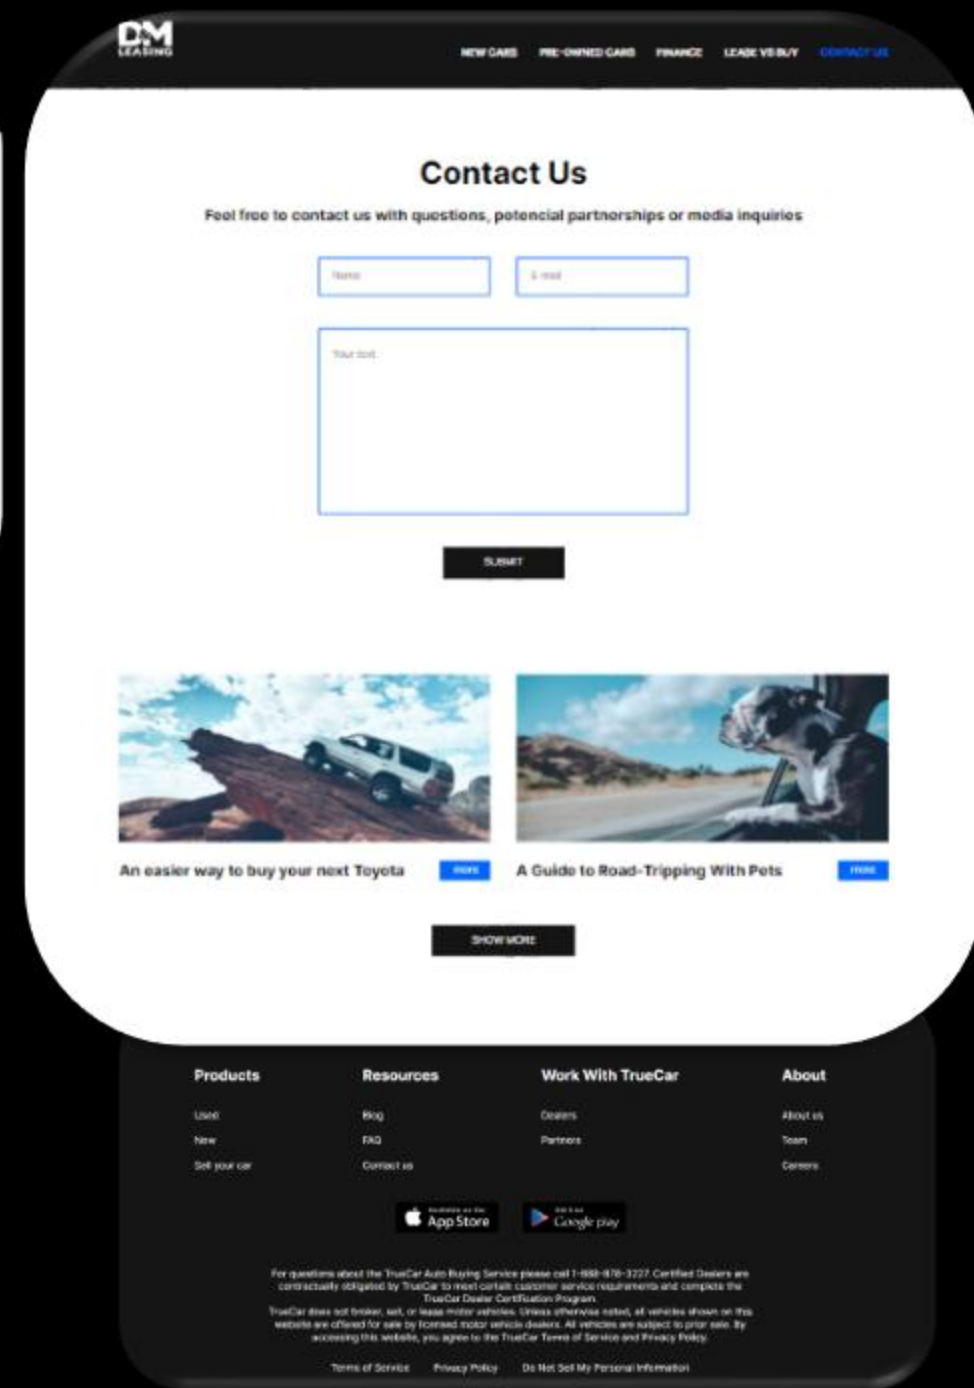

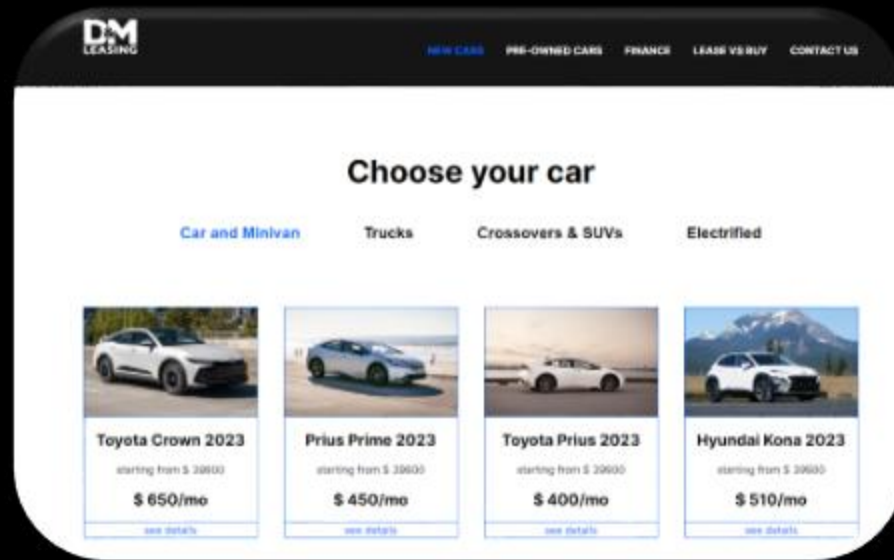

ACHIEVEMENTS:

This project allowed me to take my JavaScript skills to the next level.

It's not just about cars; it's about mastering the art of web development.

And this website is more than just a landing page; it's a testament to my dedication and growth in the field.

- **Comparing the Two Projects:**
- Both of these projects have some common threads and unique qualities.
- *Shared Characteristics:* They're both labors of love, personal projects that allowed me to sharpen my web development skills. JavaScript played a pivotal role in making both projects shine.
- *Key Differences:* The first project is a single-page stunner, a testament to my growth with JavaScript. It's all about image transitions and dynamic interfaces. The second project, on the other hand, is a full-fledged multi-page website that caters to car enthusiasts. It's a more extensive undertaking, showcasing my commitment to creating a user-friendly platform.
- **Pros and Cons:**
- *Project 1 - [AirPods MAX]:*
- *Pros:* It's a sleek, single-page site with impressive image transitions. It was a fantastic playground for mastering JavaScript.
- *Cons:* Its scope is limited compared to the second project, making it more of a learning exercise than a practical site.
- *Project 2 - [PURCHASING A VENICLE]:*
- *Pros:* This project offers a comprehensive multi-page website catering to car enthusiasts, fulfilling a real-world need. It's a testament to my web development skills.
- *Cons:* The larger scope means more complexities and a greater time investment.
- **Conclusion:**
- In a nutshell, both projects have been instrumental in my journey as a web developer. The first project is a testament to my JavaScript prowess, while the second project showcases my ability to create a user-friendly platform for a specific audience. I've grown in both technical and practical aspects of web development through these projects. They've allowed me to push my boundaries, learn, and create something I'm genuinely proud of.

PROJECT 3 (REAL) - [MANEKO-BUSINESS]

This project is like a sleek and modern landing page all about business. It's designed to look good on any screen, whether you're checking it out on your laptop, tablet, or phone. We've added some cool animations to make things pop, and there's a smooth slider that lets you glide through the key highlights of the business.

But what really sets it apart is the navigation. Click on the header or the footer, and it's like a magic carpet ride — you smoothly float down to the specific section you want to check out. It just makes the whole experience feel seamless and classy.

So, imagine this: you're scrolling through, the animations catch your eye, you click the header, and whoosh, you're gracefully taken to the exact spot you wanted. It's not just a website; it's an experience.

GOALS AND OBJECTIVES:

1. Enhance User Experience (UX):

Goal: To create an engaging and user-friendly experience for visitors.

Objectives:

Implement smooth animations and transitions for a visually appealing interface.

Ensure seamless navigation across devices, maintaining a consistent experience.

2. Responsive Design:

Goal: Develop a website that adapts seamlessly to various screen sizes and devices.

Objectives:

Utilize responsive web design techniques to optimize the layout for desktops, tablets, and mobiles.

Verify cross-browser compatibility to guarantee a consistent experience for all users.

3. Interactive Elements:

Goal: To captivate users through interactive features.

Objectives:

Implement JavaScript functionalities for dynamic content and interactive elements.

Integrate a slider for showcasing key business highlights with a user-friendly interface.

4. Navigation Efficiency:

Goal: Enable users to easily explore different sections of the website.

Objectives:

Implement a smooth scrolling mechanism when navigating through the header and footer links.

Ensure clear and intuitive menu structures for effortless exploration.

5. Brand Representation:

Goal: Reflect the business identity and values through the website design.

Objectives:

Incorporate the brand color scheme, logo, and imagery consistently throughout the site.

Use compelling content to convey the unique selling propositions and key messages.

6. Performance Optimization:

Goal: Achieve fast loading times for an optimal user experience.

Objectives:

Compress and optimize images and other assets to reduce page load times.

Employ best practices in coding and scripting to enhance overall site performance.

7. Cross-Browser Compatibility:

Goal: Ensure a consistent experience across different web browsers.

Objectives:

Test the website on various browsers (Chrome, Firefox, Safari, etc.) to identify and address any compatibility issues.

Implement fallbacks or alternatives for features that may behave differently across browsers.

8. User Engagement Metrics:

Goal: Monitor and improve key metrics related to user engagement.

Objectives:

Integrate analytics tools to track user interactions, page views, and other relevant metrics.

Use insights to make data-driven decisions for ongoing improvements.

By aligning the project with these goals and objectives, we aim to deliver a website that not only meets technical standards but also provides a compelling and enjoyable experience for users across different platforms.

DEMO: NOW LET'S SEE HOW IT WORKS.

О компании

Партнерская программа

Вопрос - Ответ

Наши преимущества - ваш успех

Рекламные показы – сила продаж
реклама — ваш первый шаг к успеху
рекламируйте товары и услуги в любой
сфере и будьте в числе первых в своей
нише.

НАША МИССИЯ И ЦЕННОСТИ

Самая большая привилегия, которая дана
человеку свыше — быть причиной добрых
перемен в чьей-то жизни.
“Цитата - Блез Паскаль”

1

Maneki Neko -
это сервис 2 в 1

2

Площадка для всех
кто хочет начать свое
дело в интернете

3

Платформа
для продвижения
товаров и услуг с
помощью простых и
надежных
инструментов

НАШИ ПРЕИМУЩЕСТВА – ВАШ УСПЕХ

Прозрачность

Мы предоставляем честную и
полную информацию о
нашей системе рекламы,
тарифах и правилах
использования.

Живая аудитория

Благодаря рекламным кампаниям
будут рекламироваться только
реальные пользователи. Ваша
аудитория растет каждый
день.

Без ограничений

Вы можете рекламировать все
виды товаров и услуг в любой
сфере независимо от того, что
предлагаете или предоставляете.

Простота

Платформа имеет интуитивно
понятный интерфейс.
Рекламные показы
производятся из личного
кабинета с индивидуальными
настройками.

Много промо и акций

Вы можете рекламировать все
виды товаров и услуг в любой
сфере независимо от того, что
предлагаете или предоставляете.

Партнерская программа

Для всех, кто хочет начать
свое дело, отличный
способ заработать и увеличить
доход на платформе – это
программа с выгодными
условиями.

Благотворительность

Наша платформа – первый шаг к
субботному Благотворительному фонду.
Помогите детям. Проводите акции и
мы вместе мы подарим счастливые детства ребятишкам.

```
1 body::-webkit-scrollbar {
2   width: 10px; /* ширина всей полосы прокрутки */
3 }
4
5 body::-webkit-scrollbar-track {
6   background: #6273D9; /* цвет зоны отслеживания */
7 }
8
9 body::-webkit-scrollbar-thumb {
10  background-color: #6273D9; /* цвет бегунка */
11  border-radius: 20px; /* округлость бегунка */
12  border: 3px solid rgb(64, 75, 137); /* отступ вокруг бегунка */
13 }
```

CONCLUSION:

- Thank you for your attention and the opportunity to share my projects. These two websites are more than just web pages; they reflect my passion and growth as a web developer. I take pride in the results and am ready to move forward, exploring new horizons in the world of web technologies. Thanks for your support and attention!
