2012 International Festival "Cities"

2011 International Competition "Star House"

"WHEN I REST, I RUST"

Architecture is a constantly changing and developing industry. My team and I have always tried to design, organically combining new trends and existing experience. Regardless of the scale of the task, whether it is a private apartment or an office of a large company, attention to detail, stylistic conformity and functional justification of the design decisions made have always been in the first place for us. My main goal is not just to create a building or an interior, but to form of a human oriented environment.

WORK EXPERIENCE

2022-2023 Participated as a guest architect in concept projects of Skevra Urban Planning Institute, Yerevan, Armenia

2015-2023 MADCREW bureau (Moscow, Russia)

2014-2015 Projekt-Z bureau (Moscow, Russia)

2013-2014 Supervised the completion of the project of the yacht club "Neftino", Yaroslavl region, Russia including the design of facades and interiors.

2011-2012 Participated as a guest architect in the design of administrative buildings of the SEC "Uglichsky", Uglich, Yaroslavl region, Russia

SKILLS

-Experience in designing buildings for various purposes

-Interaction with related specialties

-Managerial experience

-Ability to work in a team

-Manual graphics skills

Main software used: ArchiCad, SketchUp, V-Ray, Lumion, Adobe Photoshop, Piranesi

OFFICES AT LENINSKAYA SLOBODA

PROJECT OF RESTORATION AND FACILITIES

About the project:
Customer:
Private person

Address:
Moscow,
Leninskaya sloboda
19 k2

Design:
05.2015

Design and
construction
Bureau: Project-Z

Leninskaya Sloboda Street belongs to the Danilovsky district of the Southern District of Moscow. Many buildings of the settlement were part of the ensemble of the Bari Plant. Engineer and "temporary Moscow merchant" Alexander Bari began to build a forge-boiler and copper-foundry mechanical plant in 1893. No. 19 is a one-storey wooden house, one of the non-preserved buildings of the Bari engineer's factory.

BLACK STAR MUSIC LABEL OFFICE

OFFICE & PUBLIC SPACES

About the project:
Customer: Black Star
Music Label

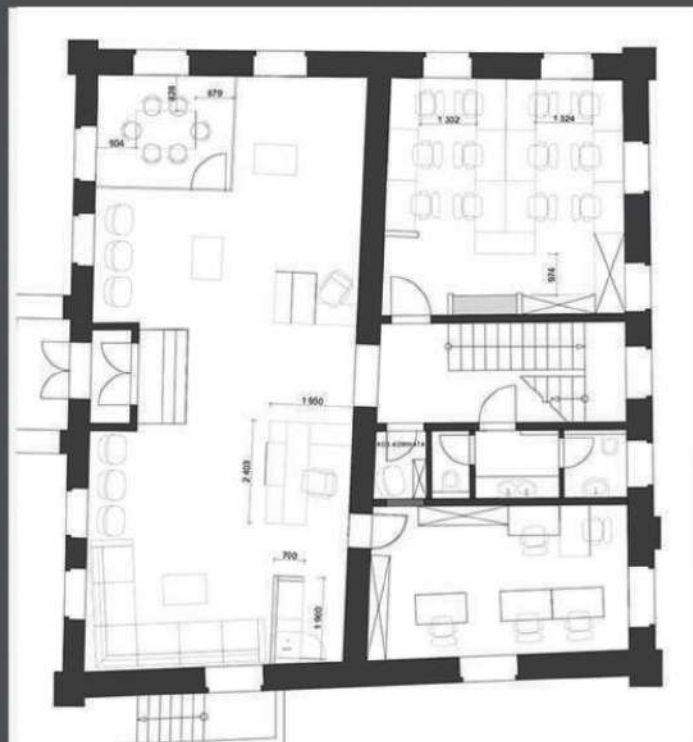

Address:
Moscow,
Yakovoapostolsky lane,
5/7/3

Project area: 490m²

Design: 01.05.2016-
01.07.2016

Implementation:
10.07.2016-10.11.2016

Design and
construction
Bureau: MADcrew

The office occupies a three-storey historic mansion in the center of Moscow. There is a spacious lobby on the ground floor. The room is divided into several functional areas: reception, meeting room, waiting and relaxation area with a bar counter. To make the space read as one, the meeting room for interviews was fenced off in the corner of the room with the solid glass partitions. The same technique was used in the executive area on the third floor, where the executive offices are located. The meeting room, which can comfortably accommodate ten people, has a corner location and is also separated from the office of the head and the reception of secretaries by glass partitions. Working rooms for employees are located on the first and second floors.

BLACK STAR MUSIC LABEL OFFICE

OFFICE & PUBLIC SPACES

The entire work area is made in the same style: white brick walls with black marker coatings and laconic white work desks with dividing screens and side tables. A different solution was chosen for the representative office. The company has three equal co-founders, each of them has his own taste, therefore, the offices on the third floor are as personalized as possible and each is made in its own color scheme. Austrian parquet was used as a floor covering here. Almost all the furniture is made to order.

The reception desk made of artificial stone became the central element of the lobby. The rack was designed specifically for the project and promptly made to order. Stylish and strict wallpaper was used to decorate the wall behind the reception. Ceramic granite with a concrete texture was chosen as a floor covering here – this solution turned out to be more practical than using polymer coatings. A well-chosen shade emphasized the monochrome of the interior.

CONGRESS CENTER ARCHCHEL-2020

COMPETITION PROJECT

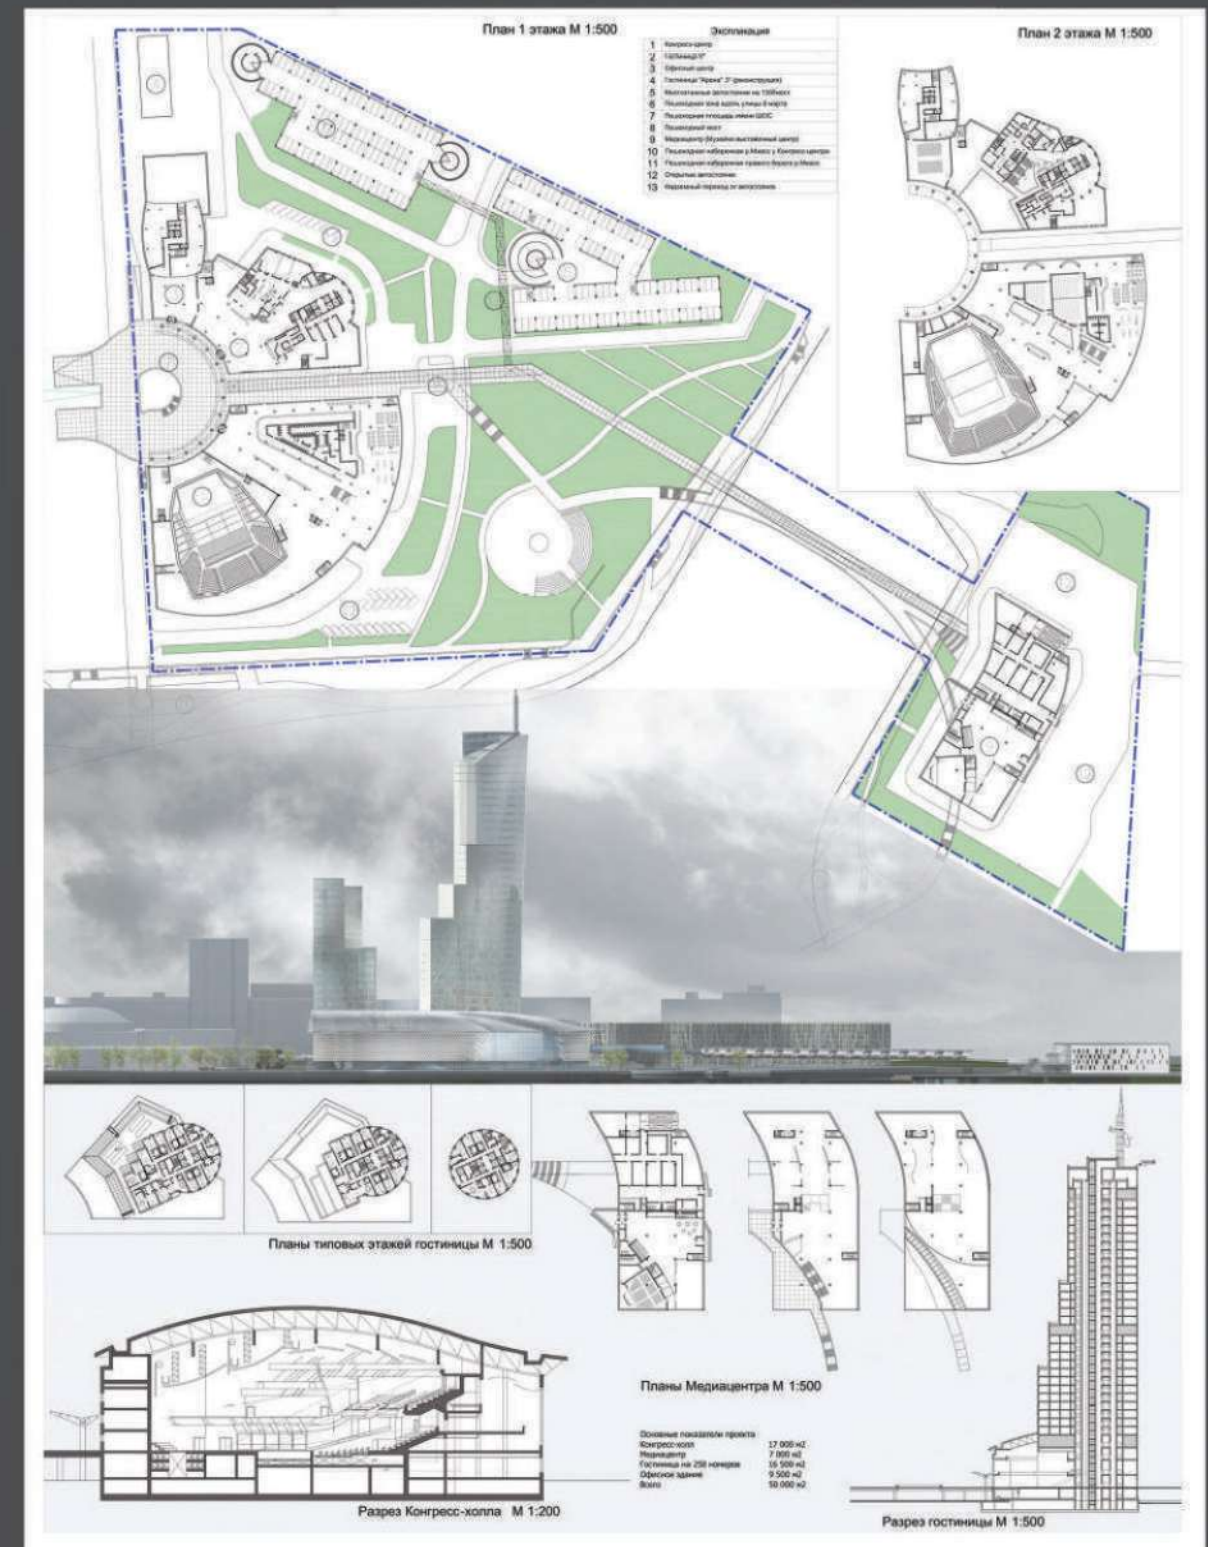

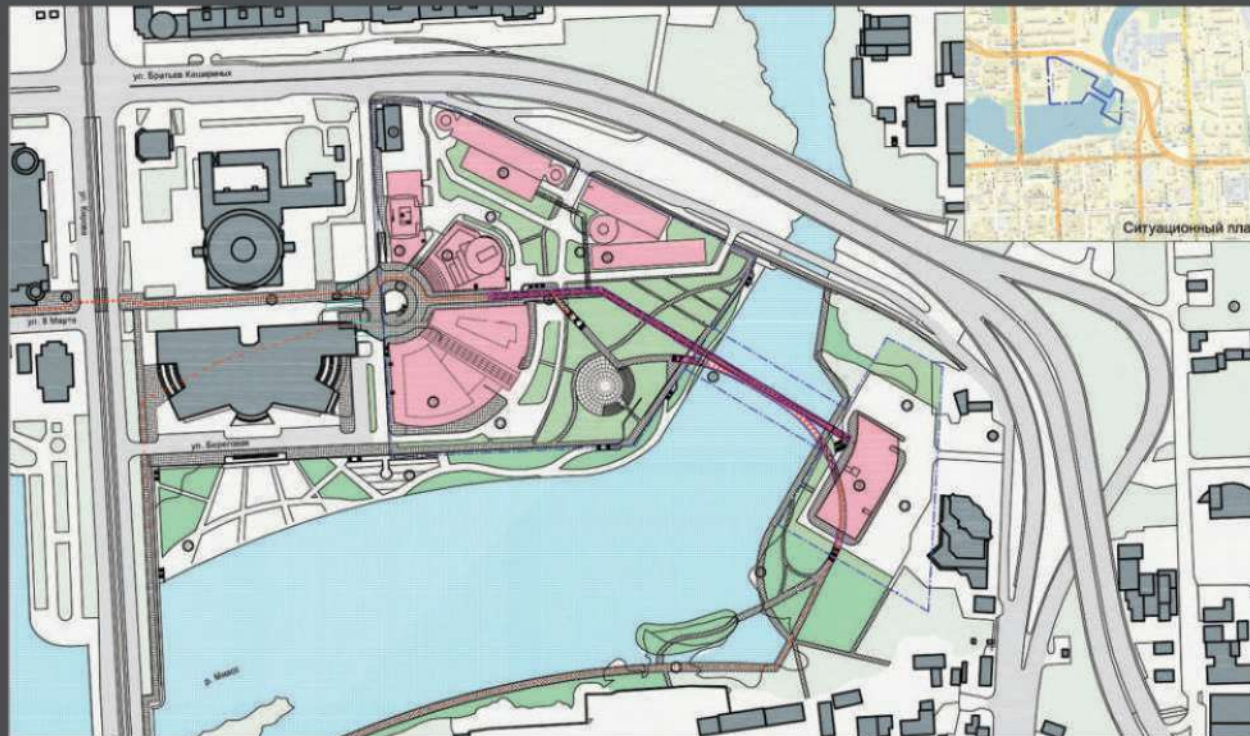

About the project:
Organizers: The Agency for International Cooperation of the Chelyabinsk Region, the Union of Designers of Russia and the regional branch of the Union of Architects of Russia.

Address:
Russia, Chelyabinsk

Holding: 2017

Design in cooperation with the architectural bureau "TTA"

The architectural concept of the complex of buildings of the Chelyabinsk Congress Center with a common planning, spatial and landscape solution of the adjacent territory was developed in accordance with the terms of the architectural competition ArchChel-2020. The project provides for the creation of the necessary modern production conditions for the creative and administrative and technical staff of the Congress Hall to create conditions of convenience.

CONGRESS CENTER ARCHCHEL-2020

COMPETITION PROJECT

Despite its significant size, the complex of buildings of the Congress Center is subordinated to the surrounding natural and architectural landscape. Separate elements of the complex play an independent role in the silhouette of the city, and, at the same time, are united by the main square, which is an important element of the composition. The building of the Congress Center forms the river facade of the city, the vertical of the hotel is the high-rise dominant of the city, the office building supports it without conflict.

The windows under the ceiling and the insufficient amount of daylight required specially thought-out lighting solutions. Track systems were placed on the suspended ceiling, allowing changing light scenarios, and high-quality camera illumination was made. Even without the ceiling lighting it is comfortable to be indoors and show video presentations. Color accents - ceiling panels, carpeting in the lounge, armchairs, sublimated moss - were chosen carefully,

BLACK STAR CREATIVE HUB

PUBLIC SPACE

Skylights and insufficient daylight required specially thought-out lighting solutions. Track systems were placed on the suspended ceiling, allowing to change lighting scenarios, and made high-quality chamber lighting. Even without the overhead lighting, it is comfortable to be indoors and make video presentations.

Color accents - ceiling panels, carpeting in the lounge, armchairs, sublimated moss - were chosen carefully, given the small area of the room, so that they "do not press", but rather conducive to comfortable work and negotiations.

SIBERINA

The official souvenir shop with the symbols of the Formula 1 race track, which hosted the Russian stage of the Grand Prix. The concept of a retail space has been developed for Rosgonki, in accordance with its orientation. The interior managed to convey the atmosphere of a race track, highlighted by elements of cars, decorative images of racers and color solutions.
