VideoGames | Programming

Courses

Java and MySQL Courses
ITVDN

Professional Experience

2024/03 – 2024/07 **ProfITSoft Internship**
Full-Stack Developer

Projects

Sacred, (Personal Diary)

My first pet project in JavaFX using Hibernate for the database. In this project you can create text notes and add images, videos and audio. After finishing your note you can rate it as good, normal or bad. You can see your notes on the main menu and sort them by your rate.
