

## StarDog Adventure

StarDog Adventure is a 2D platformer about a dog with an Oreo-shaped body and his epic adventures through MemeWorld. In this quirky world, the once-popular meme "NyanCat" reigns as king of MemeKingdom. However, after realizing that the popularity of old memes has faded, NyanCat descends into madness.

As the player, your mission is to defeat NyanCat and free the hostages trapped in his kingdom.

The game was developed using the Unity Game Engine by me (developer) and my girlfriend (designer) for a GameJam organized by GOITeens. It is entirely in Ukrainian, offering a unique cultural experience.

### Key Features:

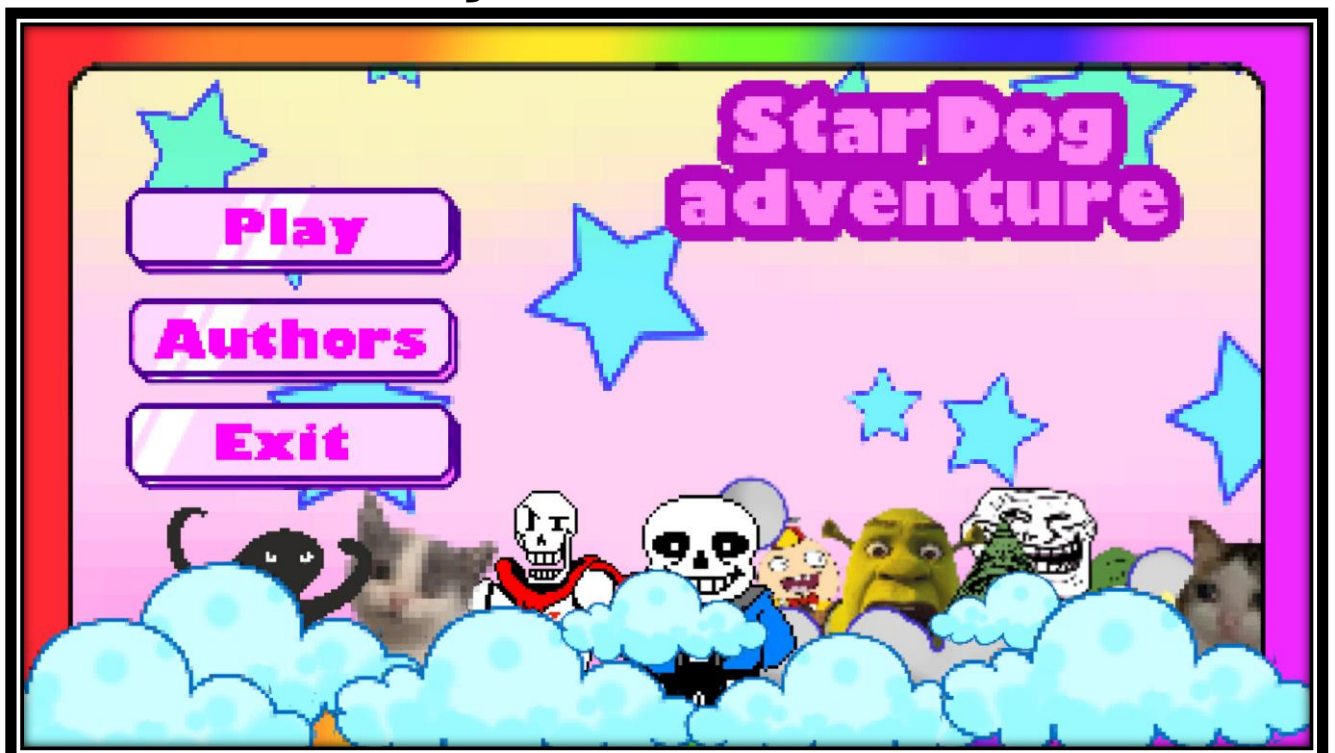

- 2D platformer gameplay
- Creative meme-inspired characters and environments
- Quirky narrative that blends humor and action
- Fully localized in Ukrainian

### Technology:

- Unity Game Engine
- Custom-designed 2D assets and characters
- Dynamic sound design and background music to enhance immersion

*StarDog Adventure* is a testament to creative collaboration, built with a passion for storytelling and game design.
