Experience

| Front-end Developer

Self-Employed / Contract-based (Freelance)

(2023 - until now)

Designed and developed 25+ web projects, including landing pages, product catalogs, e-commerce websites, and service-oriented platforms for various businesses.

Built responsive and performant user interfaces using **Next.js**, **React**, **Tailwind CSS**, **Bootstrap**, and **Webflow**.

Independently created a **custom authentication system** with **Supabase** as the backend, featuring:

➢ Email and password authentication
➢ OAuth 2.0 integration with Google and GitHub
➢ Magic link login for passwordless access
➢ Secure password reset functionality

Worked with clients on **Fiverr, Kabanchik,** collected requirements, developed, tested, and launched projects.

Focused on clean code, accessibility, SEO best practices, and fast page loading.

Summary

I'm passionate about crafting fast, responsive designs that deliver seamless experiences. In my spare time, I dive into bug bounty hunting, continuous learning, and experimenting with new tech solutions.
