## Key features

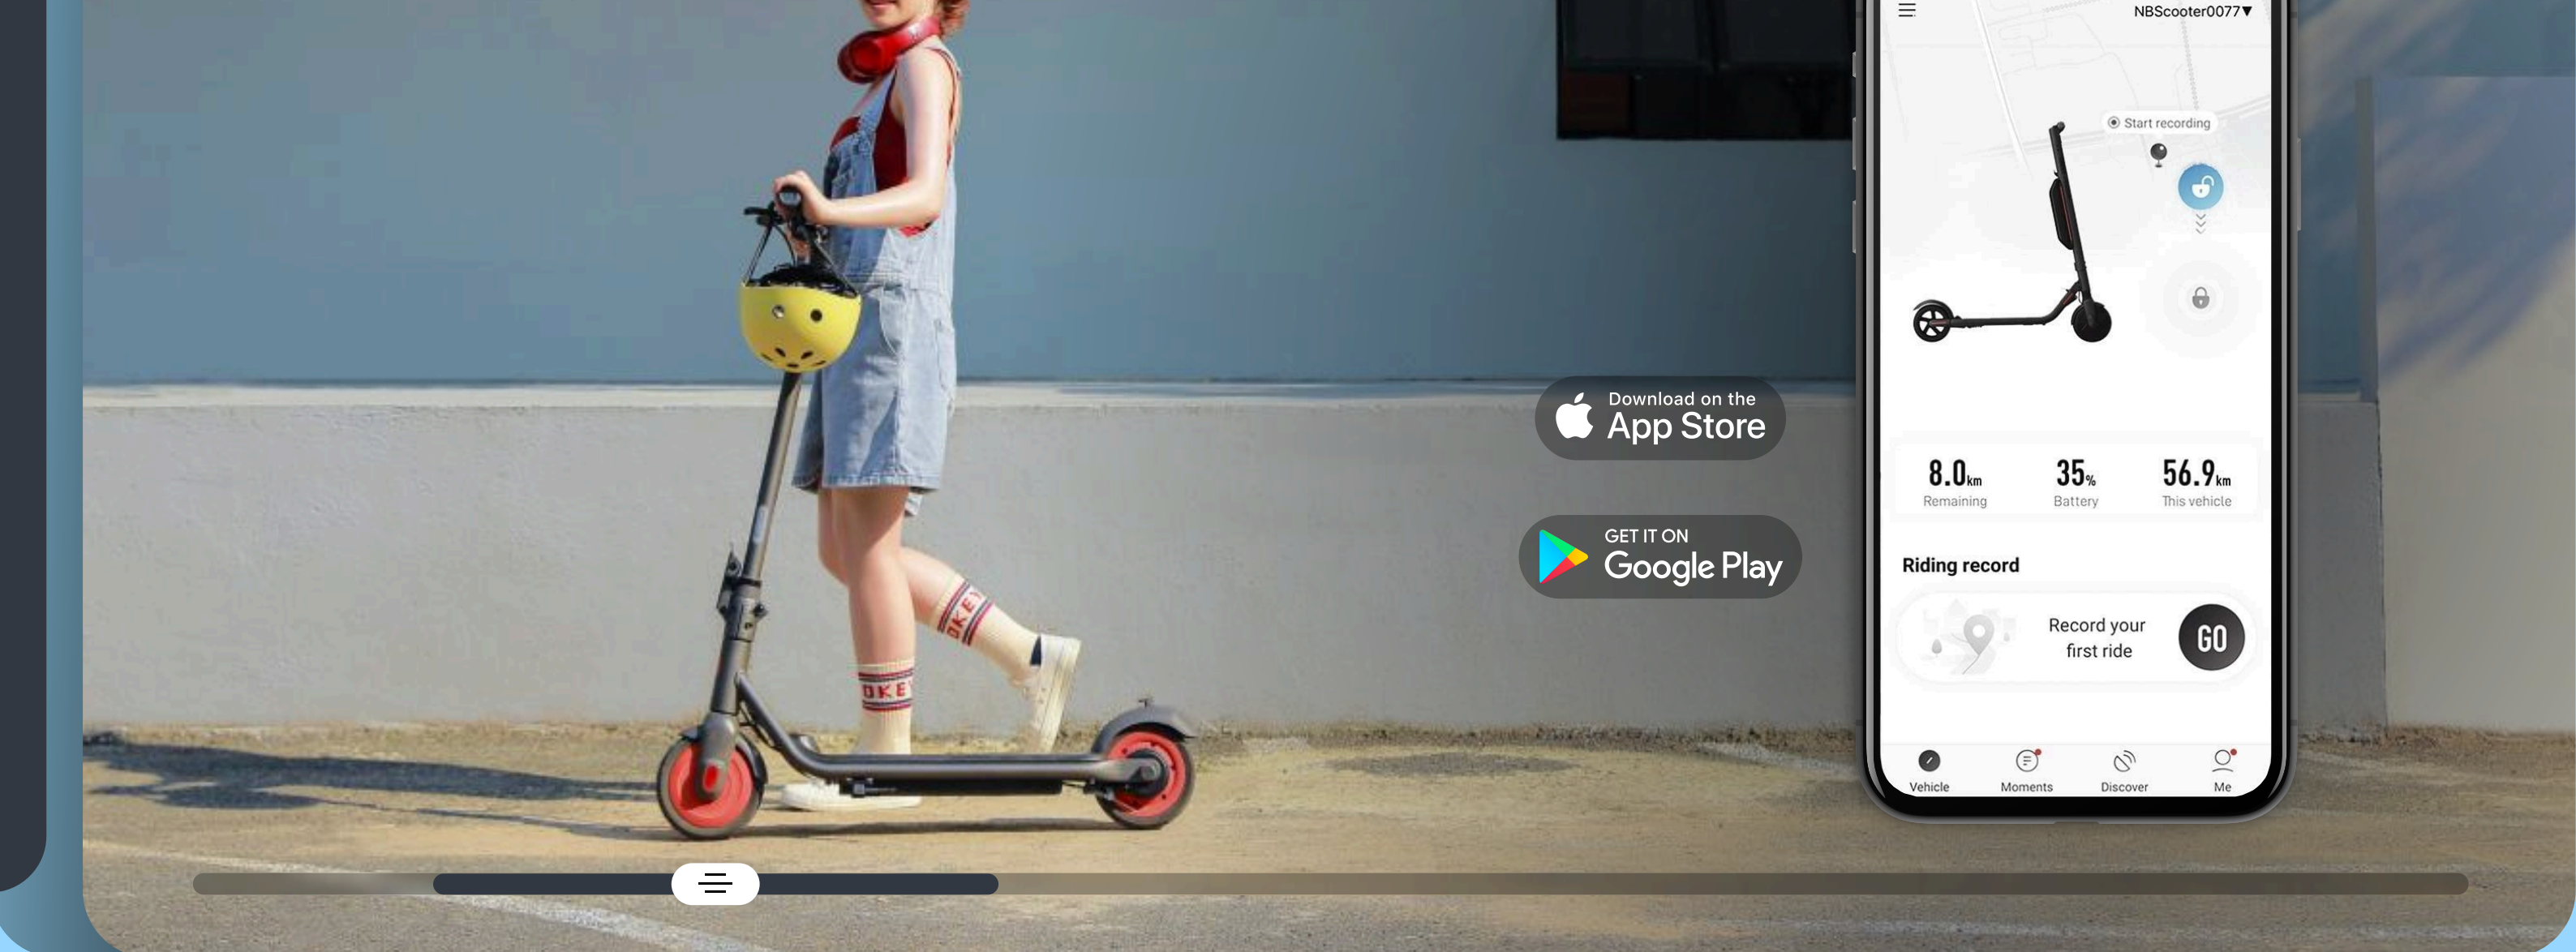

### Dual braking system

The front wheel is equipped with a mechanical drum brake, and the rear wheel is equipped with a regenerative electric brake. Such double braking equipment increases the level of safety. Both brakes have an IPX5 moisture protection level.

## Your Ninebot

KickScooter MAX is equipped with a braking system with energy recovery. Excess energy during braking accumulates and is then used in addition to the initial one.

The front wheel is equipped with a mechanical drum brake, and the rear wheel is equipped with a regenerative electric brake. Such double braking equipment increases the level of safety.

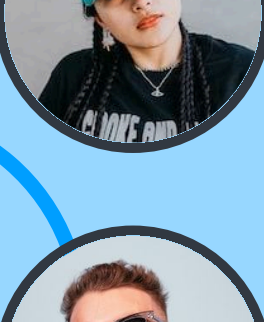

## Reviews

Jeff Miller

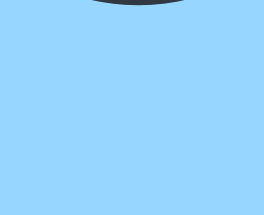

Professional rider

## Our customers speak

I liked the scooter. Good features and great price. Let's see how he behaves in the season, while there were only test runs.

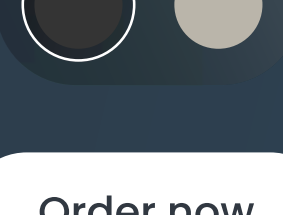

10/10
